

KEVIN LOPEZ

WEB DEVELOPER

SUMMARY

am an innovative and a task-driven web development professional with project experiences in web designs, development and software test skills across diverse industry domains. my goal is to create websites that are both visually appealing and easy to use. i take pride in exceeding client expectations and delivering projects on time.

if you are looking for a web developer with skills and experience in team management or technical support. please feel free to get in touch with me.

PROJECTS

transport management system system design and completion

the company was dealing with data stored in long registers as well as data storage in computers but it was all a messy work. i made it simple with visual basic and microsoft access and helped to add, modify delete, search and view records. data security from users who are not allowed to access the data.
